PERSONAL SUMMARY

Physics undergraduate at Middle East Technical University with a specialization in Optics and Photonics, seeking a Roketsan STAGE internship to apply technical skills in a defence-industry R&D environment. Brings hands-on laboratory experience across optics, electronics, and modern physics instrumentation, alongside strong data analysis and scientific computing skills in Python and MATLAB. Recognized by TÜBİTAK merit scholarship for academic performance. Combines analytical rigour with practical problem-solving, eager to contribute to cutting-edge rocket and missile system development within Roketsan's national technology mission.

EDUCATION

Middle East Technical University (METU) | Ankara, Türkiye Aug 2022 – Present

Bachelor of Science in Physics (Concentration: Applied Physics – Optics and Photonics)

- CGPA: 2.83/4.00 | Language of Instruction: 100% English
- Relevant coursework: Quantum Mechanics (PHYS300), Laser Applications (PHYS426), Optics & Waves Lab, Electronic Lab, Modern Physics Lab, Data Analysis Lab, Solid State Physics
- Organized 1,000+ student Iftar events during Ramadan at Campus Mosque

Vocational Open Education High School | Türkiye Aug 2021 – Jun 2022

- High School Diploma | GPA: 94.65/100.0 (High Honor Graduate) – completed entirely through self-directed study

Adıyaman Imam Hatip High School | Adıyaman, Türkiye Aug 2018 – Aug 2021

- Regional award winner, TÜBİTAK 2204-A High School Research Competition (subliminal messaging in film)
- Radio presenter and event organizer

HONORS, AWARDS & SCHOLARSHIPS

TÜBİTAK 2205 Undergraduate Merit Scholarship 2022 – Present

Awarded by the Scientific and Technological Research Council of Türkiye to top-ranking undergraduate students

A Private Foundation Scholarship & Mentorship Grant 2025 – Present

Selected based on academic performance and moral character; includes book grant and mentorship responsibilities

TÜBİTAK 2204-A Regional Award 2021

Regional winner, high school science competition; investigated subliminal messaging techniques in the film industry

RESEARCH & TECHNICAL EXPERIENCE

Physics Laboratory Coursework (Advanced) | METU 2022 – Present

- Conducted photoelectric effect experiments (PHYS307) – characterized photon energy thresholds and work functions using spectral filters and precision electrometers
- Performed Franck-Hertz experiment to verify quantized atomic energy levels in mercury vapor
- Analyzed alpha particle detection and radioactive decay statistics using Geiger-Müller counters
- Completed Gaussian beam optics assignments in PHYS426 covering beam waist propagation, ABCD matrices, LIDAR systems, and fiber optic coupling
- Solved quantum harmonic oscillator problems using ladder operator formalism and Gaussian integration in PHYS300

Independent Research – Quantum Optics & Photonics | Self-directed

- Studied étendue, numerical aperture, and optical coupling in fiber systems through conceptual and quantitative self-directed inquiry
- Investigated quantum entanglement and quantum radar physics beyond standard coursework
- Developed a nuanced hypothesis on biological mechanisms of RF/EMF exposure involving ion channel disruption and DNA repair pathways, demonstrating independent analytical reasoning

LEADERSHIP & VOLUNTEER EXPERIENCE

Academic Mentor | A Private Foundation

Jan 2025 – Present

- Provide academic tutoring in moral values, history, and religious education to high school scholarship recipients
- Mentor students on university preparation, career paths, and personal development

Search and Rescue (SAR) Volunteer | IHH Humanitarian Relief Foundation

2024 – Present

- Completed professional urban search and rescue training motivated by personal experience as a 2023 earthquake survivor
- Trained in disaster management logistics and urban rescue techniques

Peer Advisor & Student Orientation Leader | KYK Dormitories & METU

2023 – Present

- Guided 50+ incoming university students through transition to independent dormitory life
- Organized orientation events and provided peer psychological and logistical support for first-year students

Alumni Community Co-Leader | Adıyaman High School Alumni Network

2023 – Present

- Manage a network of ~150 alumni to foster mentorship and educational connections
- Organize seminars and networking events bridging high school graduates with university students

SKILLS & COMPETENCIES

Programming & Software: Python (Scientific Computing – NumPy, SciPy, Matplotlib), MATLAB, ANSYS Zemax (Optical Design), Microsoft Office Suite

Laboratory Skills: Optics & photonics experiments, electronics, modern physics instrumentation, general physics setups, data analysis and statistical error treatment

Languages: Turkish (Native), English (Advanced), Arabic (Intermediate), Kurdish (Intermediate)

Sports & Activities: Licensed Judo Athlete, Swimming, Camping and Survival Skills
